SUBJ: Maricopa County Case Number: Z2009064

On May 11, 2011, the Maricopa County Board of Supervisors (BOS) approved your request for a Special Use Permit (SUP) for a 125 MW photovoltaic (PV) solar energy generation facility in the Rural-190 zoning district for Arlington Valley Solar Energy II. The 1,433 acre site is located $\frac{3}{4}$ mi. south of Southern Pacific Trl. and west of the 355th Ave. alignment. (in the Tonopah / Arlington area).

Approval is subject to the following stipulations:

- a. Development of the site shall be in substantial compliance with the Site Plan entitled "Arlington Valley Solar Energy II, LLC", consisting of thirteen (13) full-size sheets, stamped received March 25, 2011 except as modified by the following stipulations. Within 30 days of Board of Supervisors approval, the applicant shall provide a revised Figure 3 which includes dimensions of the 32 square foot entrance sign and revisions removing the right-of-way dedication along 355th Avenue.
- b. Development of the site shall be in general conformance with the Narrative Report entitled "Arlington Valley Solar Energy II", consisting of a bound document, 34 pages with figures and appendices, dated revised March 2011 and stamped received March 25, 2011 except as modified by the following stipulations.
- c. Any special events as described in the narrative report shall be limited to 30 people. The ground breaking event will exceed this maximum number; however, the developer will make provisions for off-site parking and shuttle service.
- d. Prior to zoning clearance for any permit, legal access documentation shall be provided for the main access point.
- e. Any existing vegetation along the eastern (355th Avenue) boundary to the applicant's fence line and the southern boundary to the limits of Retention Pond E shall be maintained through construction and revegetation efforts in these areas shall be consistent with the Arlington Valley Energy Land Management Plan approved with CPA200004.
- f. All trees shall be double-staked when installed.

- g. All transformers, back-flow prevention devices, utility boxes and all other utility related ground mounted equipment shall be painted to complement the development and shall be screened with landscape material where possible. All HVAC units shall be ground-mounted or screened with a continuous parapet.
- h. Not Used
- i. Prior to zoning clearance, the applicant/property owner shall obtain the necessary encroachment permits from the Maricopa County Department of Transportation (MCDOT) for landscaping or other improvements in the right-of-way.
- j. The following Maricopa County Environmental Services (MCESD) stipulations shall be met:
- Prior to zoning clearance for issuance of the first facility building permit, all required permits for any required drinking water, sanitary and industrial wastewater permits by MCESD and Arizona Department of Environmental Quality (ADEQ) must be submitted to the appropriate agency.
 - No facility operation can begin prior to the approval of the above permits (issuance of an Approval to Construct) and a construction approval (Approval of Construction) of the required facilities signed by MCESD.
- k. All outdoor lighting shall conform to the Maricopa County Zoning Ordinance.
- l. Development of the site shall be in compliance with all applicable Maricopa County Air Quality rules and regulations.
- m. An archeological survey shall be submitted to and approved by the Arizona State Historic Preservation Office prior to issuance of a grading permit. The applicant must contact the State office prior to initiating disturbance of the site. The applicant shall provide the Planning and Development Department with written proof of compliance with this stipulation prior to zoning clearance for any building permits.
- n. The following Maricopa County Drainage stipulations shall be met:
- All development and engineering design shall be in conformance with the Drainage Regulation and current engineering policies, standards and best practices at the time of application for construction.
 - Drainage review of planning and/or zoning cases is for conceptual design only and does not represent final design approval nor shall it entitle applicants to future designs that are not in conformance with the Drainage Regulation and design policies and standards.

- All modeling and analysis shall be considered conceptual and shall be refined to a level appropriate for design with the request for construction permits.
 - Yearly status reports shall be required that shall demonstrate that the retention areas have been inspected and maintained as listed in the *Operations and Maintenance of Drainage Systems* section of the latest drainage report and with any additional information that Maricopa County may require to demonstrate that the projects drainage management system is in conformance with regulatory development requirements.
 - The requirements for status reports shall be in addition to the requirements for such reports determined by the Planning Division or other regulatory agencies.
 - With all applications of construction permits, final construction details shall be provided for all requested construction activity for which details were not requested a part of the entitlement case. This shall include, but not be limited to, fencing, signage, erosion protection, channel armoring and drywells
 - All construction activity shall be within the Special Use Permit (SUP) limits.
 - A schedule of construction shall be submitted with all phases of construction permit applications.
 - At time of construction permit application, all phases shall be demonstrated to meet regulatory development requirements independently from future phases or for prior phases not completed at time of final inspection.
- o. Development and use of the site shall comply with requirements for fire protection measures as deemed necessary by the Buckeye Valley Fire District. Prior to issuance of zoning clearance, the applicant shall seek review and comment from the applicable fire protection agency, and shall provide written confirmation that the site will be developed in accordance with their requirements.
- p. The applicant or his successor shall obtain approval of any development plans from the applicable Fire Marshall prior to any construction.
- q. This Special Use Permit shall expire forty (40) years from the date of approval by the Board of Supervisors, or upon expiration of the lease to the applicant, or upon termination of the use, whichever occurs first. All of the site improvements shall be removed within 90 days of such termination or expiration.

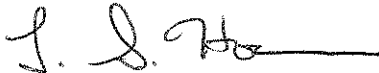

- r. The applicant shall submit an annual written report from the date of approval by the Board of Supervisors. The status report shall be reviewed by staff to determine whether the Special Use Permit remains in compliance with the approved stipulations including maintenance of drainage facilities.
- s. Amendments to the site plan and narrative report shall be processed as a revised application in accordance with Maricopa County Zoning Ordinance Article 304.9.
- t. Noncompliance with the conditions of approval will be treated as a violation in accordance with the Maricopa County Zoning Ordinance. Further, noncompliance of the conditions of approval may be grounds for the Planning and Zoning Commission to take action in accordance with Chapter 3 (Conditional Zoning).
- u. Non-compliance with the regulations administered by the Maricopa County Environmental Services Department, Maricopa County Department of Transportation, Drainage Review Division, Planning and Development Department, or the Flood Control District of Maricopa County may be grounds for initiating a revocation of this Special Use Permit as set forth in the Maricopa County Zoning Ordinance.
- v. The granting of this change in use of the property has been at the request of the applicant, with the consent of the landowner. The granting of this approval is temporary and allows the property to enjoy uses in excess of those permitted by the zoning existing on the date of application, subject to conditions and stipulations. In the event of the failure to comply with any condition or stipulation, and at the time of expiration of the Special Use Permit, the property shall revert to the zoning that existed on the date of application. It is, therefore, stipulated and agreed that either revocation due to the failure to comply with any conditions or stipulations, or the expiration of the Special Use Permit, does not reduce any rights that existed on the date of application to use, divide, sell or possess the property and that there would be no diminution in value of the property from the value it held on the date of application due to such revocation or expiration of the Special Use Permit. The Special Use Permit enhances the value of the property above its value as of the date the Special Use Permit is granted and reverting to the prior zoning results in the same value of the property as if the Special Use Permit had never been granted.
- w. If a building permit for the facility has not been issued within three (3) years from the date of Special Use Permit (SUP) approval, this SUP and the related Comprehensive Plan Amendments (CPA200808, CPA200914, CPA200915, and CPA200918) will be scheduled for public hearing by the Maricopa County Board of Supervisors, upon recommendation by the Maricopa Planning and Zoning Commission, to consider reverting the zoning to Rural-190 and the related land use designations to Open Space and Rural respectively. Additionally, in the event of the reversion, the Land Management Plan associated with CPA200004 shall be implemented.

- x. *Prior to any ground disturbance activities and prior to the issuance of any construction permits, the developer shall provide assurance in an amount and form acceptable to the Maricopa County Planning & Development Department sufficient to restore or stabilize the entire site in the event the project is abandoned, expires, or otherwise becomes defunct.*

- y. Per the February 28, 2011 recommendation of the Maricopa County Department of Transportation (MCDOT), the applicant agrees to provide paved access to the site. In the event that the Arizona State Land Department (ASLD) denies the applicant the ability to pave the road to Old US Highway 80, MCDOT shall have the discretion to accept an alternative form of surfacing. Paving or alternative surfacing must be in place before solar plant construction.

Please call me if you have any questions at 602-506-3927.

Sincerely,

A handwritten signature in black ink, appearing to read "T. S. Hogan", followed by a horizontal line extending to the right.
